

# Cleaning & Disinfection checklist

In efforts to keep you and your loved ones healthy and safe while experiencing Colorado, I have cleaned and sanitized my vehicle per CarGari cleaning guidelines with focus on what is considered to be the high traffic 'Hot Spots' of any vehicle.

## High Traffic “Hot Spots”

- Exterior door handles and Trunk handle
- Interior door handles
- Seat belt
- Seat position controller
- Gear selector
- Steering wheel
- Stereo/Navigation system
- Sun visor
- Elbow rest latch
- Key Fob
- Infotainment system
- Temperature control

## Cleaning and Disinfection

**Cleaning** – Using water and soap on surfaces removes dirt but does not disinfect.

**Disinfection** – Requires the use of chemicals designed to kill germs once the surface has been cleaned.

It is essential to carry out both the cleaning and disinfection of high traffic 'Hot Spot' surfaces.
